Projections are model estimates; Fantrax is the official record.

Get set up in 60 seconds

- 1 **Open the link** on your phone or computer: gavinpastreich.github.io/dynasty-puck
- 2 **Pick your team** (🗨️ button, top right). The dashboard, Team Hub, matchups, trade ideas and cap tools tailor themselves to you. It's remembered on your device only.
- 3 **Add it to your home screen** (Share → Add to Home Screen on iPhone, ⋮ → Add to Home screen on Android) so it opens like an app.
- 4 **Turn on alerts** (🔔 Alerts) if you want a lineup reminder before every lock, a calendar of locks, or the Monday email. Totally optional.

Tip: press / anywhere to search any player. Click a player's name anywhere in the app to open his card.

Always up to date

Live Every time you open the site it pulls rosters, contracts, salaries, lineup slots and standings straight from our Fantrax league. The green **Live** dot in the header means you're looking at Fantrax as of right now.

Nightly Every night (1 AM and 6 AM ET) the site refreshes NHL stats and schedules, injuries and line combos (Daily Faceoff), projections and the live scoreboard, all automatically.

Rules Our cap, contract, playoff and draft rules are built in, so every number follows league rules.

Your team, and your lineup, at a glance

Lineups lock weekly, so one bad lineup costs a whole week. The app checks the lineup you've actually set in Fantrax against the best possible one, before the lock.

Fantrax lineup check

The lineup set in Fantrax right now (Active slots) against the optimal weekly-lock lineup, for the next lock.

Graduation watch: Noah Laba (74/84 career GP, projected to graduate week 4), Isaac Howard (29/84 career GP, projected to graduate week 23), Tom Willander (70/84 career GP, projected to graduate week 5). A player on your active roster when he graduates can't be moved back down to the minors.

Players in Minors slots have to be moved up in Fantrax first (Active + Bench max 23).

Lineups synced live from Fantrax at 1:46 PM. Opponent uses their Fantrax lineup too. Injuries from Daily Faceoff.

Fantrax lineup check (Team Hub; also on the dashboard): expected categories as set vs optimal, who to start or sit, injured or idle starters, and goalie-minimum risk, with a countdown to the lock.

Team Hub: category profile vs the league, what your team should do (FA targets, complementary trade partners, cap notes), lineup by week.

What you can do

- See where you rank in each of the **15 categories** and which ones to fix.
- Get **free-agent targets** ranked by how many category wins they add to *your* lineup.
- Know whether to **buy or sell**: contender, bubble or not contending, with buy targets or sell candidates and who'd pay most.
- Find **trade partners** whose strengths match your needs (and vice versa).
- **Punt check**: would ignoring a category win you more overall?
- Plan around **graduations**: MNR players close to 84 career GP (42 for goalies). The lineup check warns before you promote one who's about to graduate.
- See your **cap by season** with the rising cap line (\$104M → \$113.5M → \$127.5M projected).

A 2-minute weekly routine: (1) open the **Dashboard** and fix anything the lineup check flags before the lock; (2) glance at **Free Agents** for adds that fit your categories; (3) check the **Weekly Preview** for your matchup's swing categories; (4) during the week, follow it on the **Live Scoreboard**.

Live scoreboard, matchups and standings

Live Scoreboard: where every category stands, the projected final and each side's chance to win it, with the rest of the week simulated from remaining NHL games. *Pictured: an illustration made from real NHL stats of a past week on current lineups; the live board starts the morning after opening night and updates overnight.*

During the week

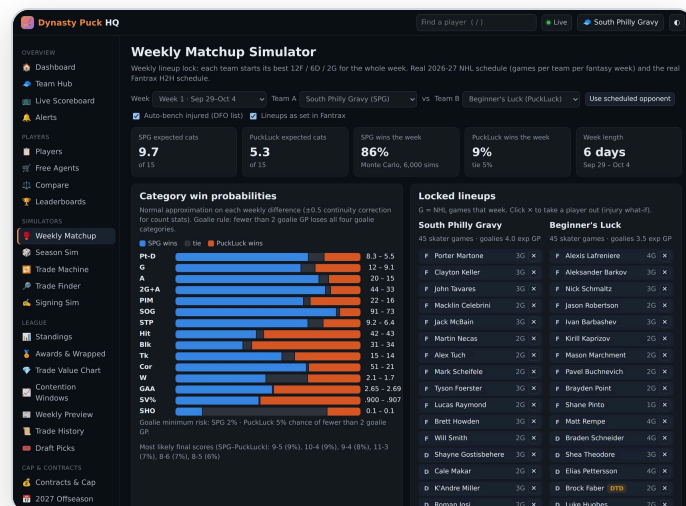

- Live Scoreboard:** current score (who leads each category), projected finals, win odds, and each player's line for the week.
- Weekly Matchup:** any two teams, any week. Use the "lineups as set in Fantrax" switch, or take players out to test injury what-ifs.
- Weekly Preview:** an auto-written preview of every matchup plus a **lineup watch** for all 14 teams. One tap copies it for the group chat.
- Standings:** the real Fantrax W-L-T with East/West divisions, projected final record, playoff and title odds, and #1-pick odds.

The season sim starts from the real standings and only simulates the weeks left. Division winners are seeds 1-2.

Optional heads-ups for your team: pick any, all or none. Nothing goes to the league group chat, nothing needs an account here, and you can stop any time. Alerts are sent automatically by GitHub every hour (lineup reminders about 3 hours before each lock, a morning note when something happens to your team, a Monday digest).

My team: Worcester Gators (btsay45)

Phone push

Free **ntfy** app, no sign-up. You get: your Fantrax lineup check before every lock (who to start or sit, injured starters, goalie-minimum risk), plus a morning note when your roster changes, a player gets hurt, or a prospect is about to graduate, and a heads-up the day before the trade deadline.

1. Install **ntfy**: iPhone · Android (or use the web app on a computer)
2. Tap **Subscribe** below on your phone, or add this topic in the app: `dynastypuck-7q2-btsay45` Copy
3. Send yourself a test to check it works.

578 unvired players with a 2026-27 projection, ranked by fit for **Upper Darby Rats**: the change in your expected next-season category wins if you add the player (your fanbase re-simulated every week, replacing whoever he bumps).

Fit for **Upper Darby Rats (inert)** ☐ Exact fit for the top 80; others show a quick estimate (~).

Weakest categories for merit: **PED** (12th), **SV%** (12th), **HIT** (9th), **A** (8th), **BK** (8th). The fit score already weighs these by how often they swing your matchups.

Note concerning merit: has 3.0% title odds, so a 2026-27 category win is worth x0.6 the league average to you. Use roster spots on players with a future (try the **Age ≥ 23** filter!) unless the pickup is cheap to cost. [Why →](#)

Trade strategy Not contending

Not a title team this season (0.0% title odds). 2026-27 production is worth ×0.2 to you but up to ×3.2 to a contender, so veterans on short deals should fetch more in picks and young players than they add here.

Cap hit penalties

Dead cap already on the books: dropped BID, RFA1 and ELC contracts keep 50% of each remaining season (dropping an FA contract is free). From the contract sheet (deals no longer on that roster), drops seen in Fantrax, and the commissioner's cap_penalties.csv (edit it to match Fantrax's "Cap hit penalties"). Included in every cap-space number.

2027 Offseason planner

Every decision coming next summer: ELCs, RFAs (with the right formula for each player), who turns 27 and hits the auction, the model's call, 2027-28 cap outlook at \$113.5M, and a priced preview of the UFA auction.

Dynasty Puck HQ · league guide

8

Get ready for the 2027 UFA auction: every team's budget, the whole player pool with projected prices, and a plan for your team.

Budgets and max bids for all 14 teams, targets that fit your team and your budget, "nominate early" ideas to drain rivals' cap, your hometown-discount players, and the pool with prices and the contract length each price implies.

Calibrated on this summer's auction (62 signings, \$147.9M spent). Owners paid about 3-4× more per projected win for players under 27, so prices follow each player's next three seasons. They also scale with how much cap space the league will have next summer. Treat them as a guide; the 2026 auction had no true stars.

Tap **Mark sold** as players go: budgets update and the remaining prices re-adjust to the money and talent left. The **hometown discount** (10% off for the team that held a player from the trade deadline to season's end) is shown for every player.

Prospects & MNR

250 rostered MNR players. Graduation rules: an MNR player graduates at 84 career NHL regular-season GP (skaters) or 42 (goalies), counted from the last 4th career totals (all past seasons, not just last year, and games included). A player who graduates during the season stays at \$0 for the rest of it and signs his ELC (\$1.5M) in the offseason (or is dropped). If he is on your active roster when he graduates he has to stay there; if he is in the minors he can stay down, but once promoted he can't be sent back. One who hasn't graduated by the end of the regular season stays at \$0. MNR players can be started in your weekly lineup.

League rules, as the app uses them

Every number in the app follows these. The commissioner keeps them in one settings file, so they stay current.

Scoring	15 weekly head-to-head categories. Skaters: Pt-D (points by defensemen), G, A, 2G+A, PIM, SOG, STP, Hit, Blk, Tk, Cor. Goalies: W, GAA (lower wins), SV%, SHO. Standings = total category W-L-T.
Lineups	Lock weekly when the Fantrax scoring period starts. 12 F / 6 D / 2 G starters + 3 bench. MNR players can be started.
Goalie minimum	Fewer than 2 goalie games in a week loses all four goalie categories.
Playoffs	8 teams, no byes, weeks 25-27 (Mar 22 - Apr 10, 2027). Division winners are seeds 1-2, then by record. 1v8, 4v5, 3v6, 2v7.
Salary cap	\$104M (2026-27), \$113.5M (2027-28), \$127.5M projected for 2028-29 (NHL's estimate). Contracts: BID, RFA1, ELC1 (\$1.5M), MNR (\$0), FA.
MNR graduation	84 career NHL GP (skaters) / 42 (goalies). Stays \$0 the rest of that season; ELC (\$1.5M, 1 or 2 years) or release in the offseason. Active-roster graduates can't be sent down.
When an ELC is up	Release, or re-sign: 2 yrs \$2.5M · 3 yrs \$4.0M · 4 yrs \$5.5M · 5 yrs \$7.0M · 6 yrs \$9.0M · or one more ELC year at \$1.75M (then UFA).
Post-ELC RFA	Under 27 on June 30: re-sign 2-6 years at 1.5× (2-4 yrs) or 1.75× (5-6 yrs) of the base; the base can't go down. Offer sheets allowed (offers or trade packages for his rights). 27+: UFA auction.
RFA on an auction contract	BID and RFA1 players use the league formula (S = salary): 1 yr S+1 · 2 yrs 1.5S+1 · 3 yrs 1.5S+2 · 4 yrs 1.5S+3 · 5 yrs 1.75S+4 · 6 yrs 1.75S+5 (\$M; 2027 numbers not final).
UFA auction	The winning bid sets the term: \$1-2.9M 1 yr · \$3-4.4M 2 · \$4.5-7.4M 3 · \$7.5-9.9M 4 · \$10-13.9M 5 · \$14M+ 6.
Trade deadline	Friday, Jan 29, 2027 at 11:59 PM ET.
Hometown discount	The team that had the player from the trade deadline to season's end pays 10% less than its winning bid (the bid still sets the term).
Injured reserve	A player in an IR slot in Fantrax doesn't count against this season's cap. Activating him puts his salary back on it.
Dead cap	Dropping a BID, RFA1 or ELC contract keeps 50% of the salary for every remaining year. Dropping an FA contract is free.
League draft	3 rounds. Reverse standings: worst record picks 1st, champion 14th. Picks exist through 2029; a year is added after each draft.

HOW IT WORKS

Where the numbers come from

Fantrax (live): rosters, contracts, salaries, lineup slots, standings, divisions, draft picks. Fantrax is always the official record.

NHL public data (nightly): stats, career games, schedules (84 games, real games per fantasy week), and this season's box scores for the live scoreboard.

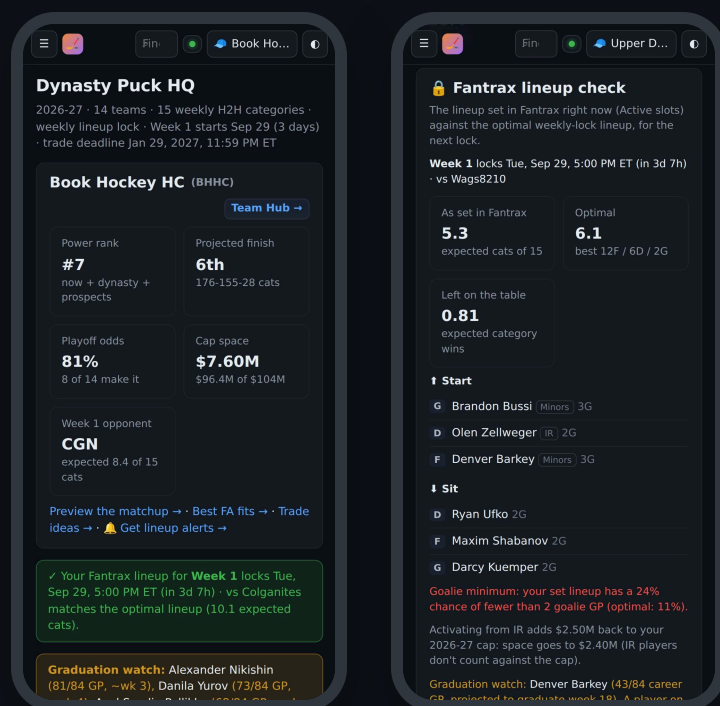

Projections: Fantrax's 2026-27 projections, with Takeaways and Corsi projected by the app, blended with real stats once games start.

Research: injuries and line combinations from Daily Faceoff; draft boards from public rankings; the league's contract sheet and trade history.

Values: WAR = expected category wins above a replacement player. Dynasty value adds up to 7 seasons with age curves, our contract rules and cap cost.

Simulations: every weekly matchup is simulated category by category (goalie minimum included) on the real schedule, thousands of times.

Projections and odds are estimates, not facts. The **Rules & Methods** page in the app explains every formula, and **Data & Updates** shows the sync status and lets you export anything to CSV.
