DYNASTY PUCK · 2026-27 LEAGUE GUIDE

Dynasty Puck HQ

One website for our league: live Fantrax rosters, weekly lineup checks, matchup odds, trade and contract tools, prospects, drafts and a lot more. Free, no login, works on your phone.

gavinpastreich.github.io/dynasty-puck

🔒 Lineup check before every lock · 📺 Live scoreboard · 🧩 Category insights · 🔁 Trade machine · 💰 Cap & contract planner · 🔨 Auction war room · 📡 Prospect Radar & mock draft · 🔔 Opt-in alerts

Projections are model estimates; Fantrax is the official record.

START HERE

Get set up in 60 seconds

1. **Open the link** on your phone or computer: **gavinpastreich.github.io/dynasty-puck**
2. **Pick your team** (🧢 button, top right). The dashboard, Team Hub, matchups, trade ideas and cap tools tailor themselves to you. It's remembered on your device only.
3. **Add it to your home screen** (Share → Add to Home Screen on iPhone, ⋮ → Add to Home screen on Android) so it opens like an app.
4. **Turn on alerts** (🔔 Alerts) if you want a lineup reminder before every lock, a calendar of locks, or the Monday email. Totally optional.

> **Tip:** press **/** anywhere to search any player. Click a player's name anywhere in the app to open his card.

Always up to date

Live Every time you open the site it pulls rosters, contracts, salaries, lineup slots and standings straight from our Fantrax league. The green **Live** dot in the header means you're looking at Fantrax as of right now.

Nightly Every night the site refreshes NHL stats, schedules, injuries and lines (Daily Faceoff), projections, prospect rankings and headlines. During NHL games the live scoreboard updates every few minutes.

Rules Our cap, contract, playoff and draft rules are built in, so every number follows league rules.

EVERYTHING IN THE APP

🏠 Dashboard
Your team's power rank, playoff odds, cap space, this week's opponent and lineup check.

📺 Live Scoreboard
This week's category score for every matchup, updated during games; projected finals and win odds.

📋 Players · 🛒 Free Agents
Every player with projections, value, contract; best FA fits for your team.

🥊 Weekly Matchup · 🎲 Season Sim
Category-by-category odds; full-season Monte Carlo with playoffs.

📊 Standings · 🧩 Category Insights
Real standings and odds; every team's strength in all 15 categories; trade-partner fit.

📰 Weekly Preview · 📜 Trade History · 🎟️ Draft Picks
Matchup write-ups for the chat; every trade graded; who owns which pick.

🔨 Auction War Room
Next summer's budgets, prices, targets and a live sale tracker.

🎯 Draft Center · 🧪 Mock Draft · 🏅 Awards & Wrapped
Draft boards to 2029; mock the 2027 league draft; award races and a team recap.

🧢 Team Hub
Lineup check, trade strategy (buy or sell), category needs, cap by season, prospects.

🔔 Alerts
Opt-in lineup reminders on your phone, calendar or email.

⚖️ Compare · 🏆 Leaderboards
Up to four players side by side; league-wide leader boards.

🔁 Trade Machine · 🔎 Trade Finder
2-4 team trades with picks; "what would it take to get X?"

💎 Trade Value Chart · 📈 Contention Windows
Every player and pick on one scale; who's really contending and who's built for later.

💰 Contracts & Cap · 📅 2027 Offseason · ✍️ Signing Sim
Cap by season, penalties, RFA/ELC decisions with prices; plan signings and drops.

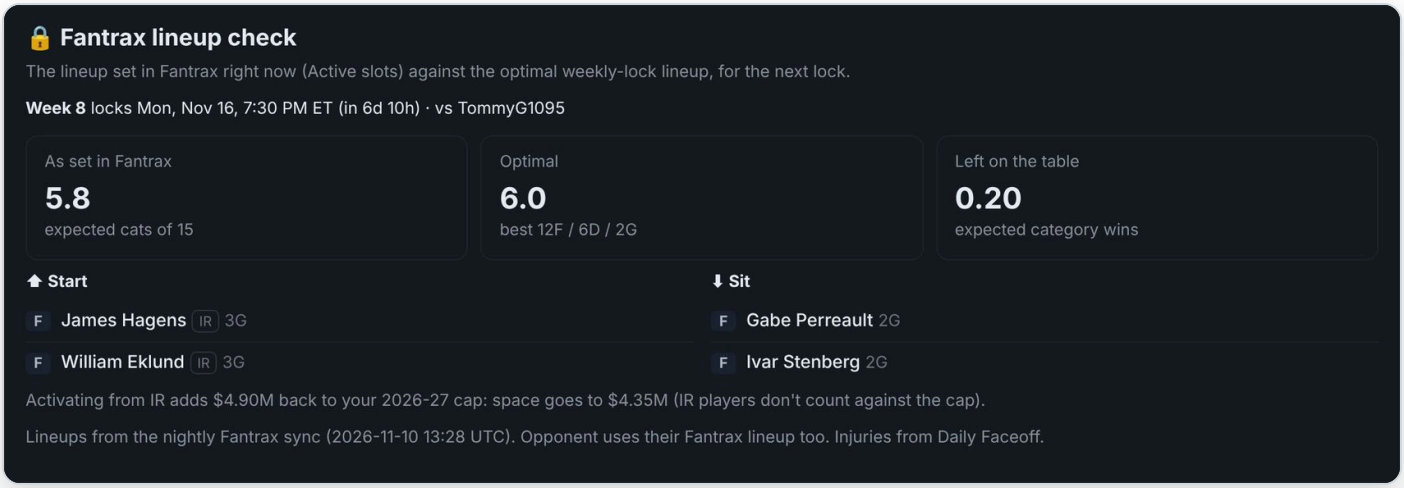

📡 Prospect Radar · 🌱 Prospects & MNR
Every prospect re-ranked nightly with risers, fallers and headlines; MNR graduation tracker.

🗓️ Schedule Tools · 🩹 Injuries & Depth
Games per week, streaming and goalie planners; injuries and lines.

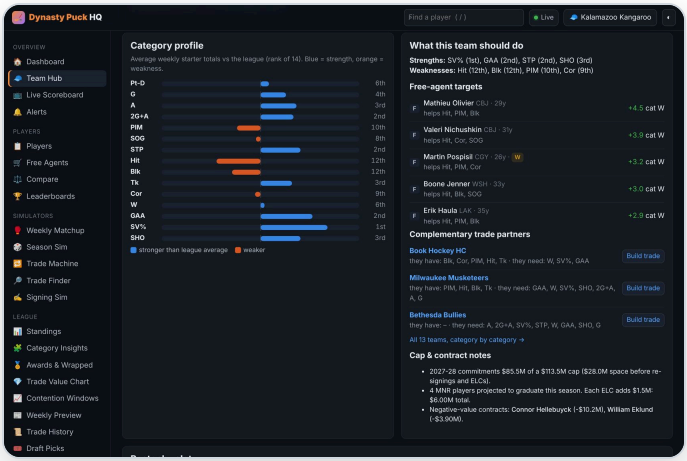

EVERY WEEK

Your team, and your lineup, at a glance

Lineups lock weekly, so one bad lineup costs a whole week. The app checks the lineup you've actually set in Fantrax against the best possible one, before the lock.

🔒 Fantrax lineup check (Team Hub; also on the dashboard): expected categories as set vs optimal, who to start or sit, injured or idle starters, and goalie-minimum risk, with a countdown to the lock.

Team Hub: category profile vs the league, what your team should do (FA targets, complementary trade partners, cap notes), lineup by week.

What you can do

- See where you rank in each of the **15 categories** and which ones to fix.
- Get **free-agent targets** ranked by how many category wins they add to *your* lineup.
- Know whether to **buy or sell**: contender, bubble or not contending, with buy targets or sell candidates and who'd pay most.
- Find **trade partners** whose strengths match your needs (and vice versa).
- **Punt check**: would ignoring a category win you more overall?
- Plan around **graduations**: MNR players close to 84 career GP (42 for goalies). The lineup check warns before you promote one who's about to graduate.
- See your **cap by season** with the rising cap line ($104M → $113.5M → $127.5M projected).

A 2-minute weekly routine: (1) open the **Dashboard** and fix anything the lineup check flags before the lock; (2) glance at **Free Agents** for adds that fit your categories; (3) check the **Weekly Preview** for your matchup's swing categories; (4) during the week, follow it on the **Live Scoreboard**.

GAME WEEK

Live scoreboard, matchups and standings

📺 Live Scoreboard: where every category stands right now, the projected final and each side's chance to win it, with the rest of the week simulated from the NHL games still to play. It updates every few minutes while games are on.

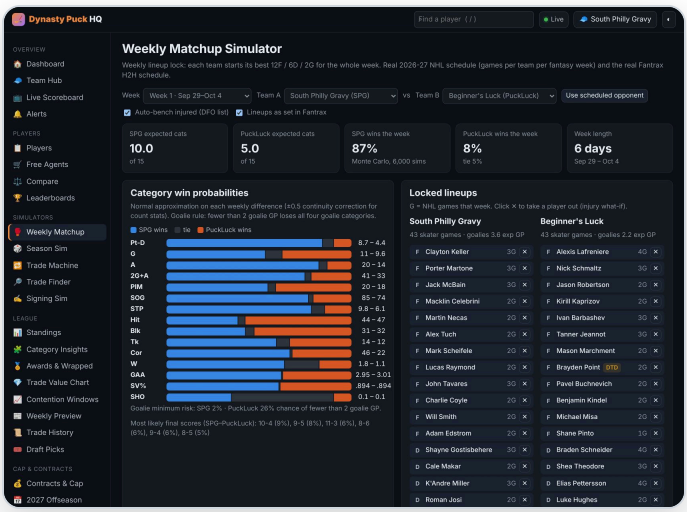

During the week

- **Live Scoreboard**: current score (who leads each category), projected finals, win odds, each player's line for the week, tonight's NHL games, and a week picker for every finished week.
- **Weekly Matchup**: any two teams, any week. Use the **"lineups as set in Fantrax"** switch, or take players out to test injury what-ifs.
- **Weekly Preview**: an auto-written preview of every matchup plus a **lineup watch** for all 14 teams. One tap copies it for the group chat.
- **Standings**: the real Fantrax W-L-T with East/West divisions, projected final record, playoff and title odds, and #1-pick odds.

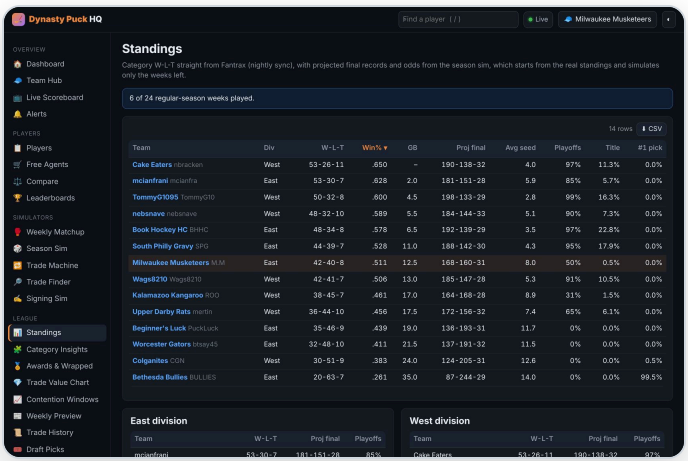

The season sim starts from the real standings and only simulates the weeks left. Division winners are seeds 1-2.

📰 Lineup watch (Weekly Preview): every team's Fantrax lineup vs its best lineup.

🥊 Weekly Matchup: category win probabilities, locked lineups and games per player.

📊 Standings with divisions, projected finish and odds.

CATEGORIES

Who is strong where, and who to trade with

Fifteen categories decide every week. Category Insights shows how all 14 teams stack up in each one, so you can see what you are really short of and who has it to spare.

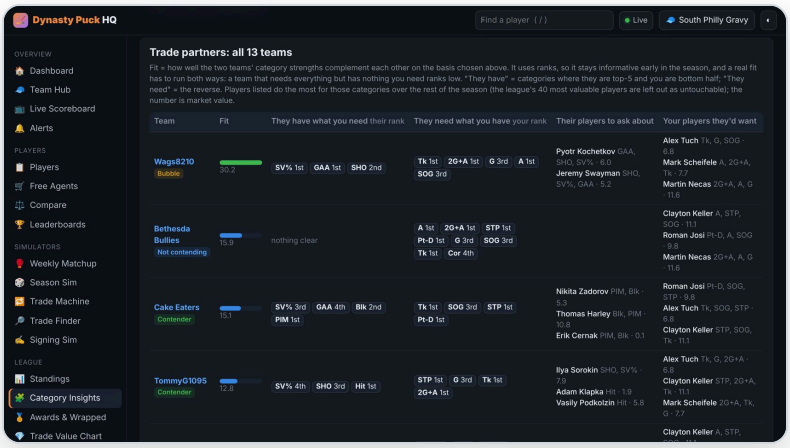

League by category

Blue = stronger than the league, orange = weaker. Teams are sorted by average rank. Hover or tap a cell for the details; tap a category name to drill in.

Team	Pt-D	G	A	2G+A	PIM	SOG	STP	Hit	Blk	Tk	Cor	W	GAA	SV%	SHO	Avg
mcianfra	5	5	5	6	5	8	4	4	4	4	6	2	2	5	1	4.4
nebsnave	4	2	8	5	3	1	6	2	6	7	8	5	6	6	11	5.3
mertin	11	1	6	3	2	6	8	3	8	3	5	4	5	10	6	5.4
SPG	1	3	1	1	8	3	1	8	9	1	4	7	12	13	10	5.5
BHHC	9	7	3	4	6	2	5	6	1	2	1	13	11	12	5	5.8
ROO	7	6	2	2	12	7	3	12	10	8	10	3	3	2	4	6.1
nbracken	8	4	7	7	1	10	9	7	2	10	7	6	4	3	7	6.1
TommyG10	3	11	4	8	7	4	10	1	13	9	2	10	9	4	3	6.5
Wags8210	2	13	10	12	9	9	7	9	7	13	3	1	1	1	2	6.6
M.M	10	10	9	10	4	5	2	5	3	5	13	12	13	11	12	8.3
btsay45	6	9	11	9	11	12	11	11	5	14	14	9	10	7	8	9.8
PuckLuck	14	8	13	13	13	13	13	10	12	6	9	8	8	8	13	10.7
CGN	12	12	12	11	10	11	12	14	11	11	11	11	7	9	9	10.9
BULLIES	13	14	14	14	14	14	14	13	14	12	12	14	14	14	14	13.6

Check: the rebuilt category records differ from the Fantrax standings on 24 of 1260 team-category decisions (Cor is estimated, so near-ties in Cor can flip).

🧩 Category Insights: every team's rank in every category. Blue is stronger than the league, orange weaker. Switch between what has actually happened, the projection for the rest of the season, or a blend of the two.

Trade partners: all 13 teams ranked by fit, with the categories each side has to offer and the players who move them.

How to use it

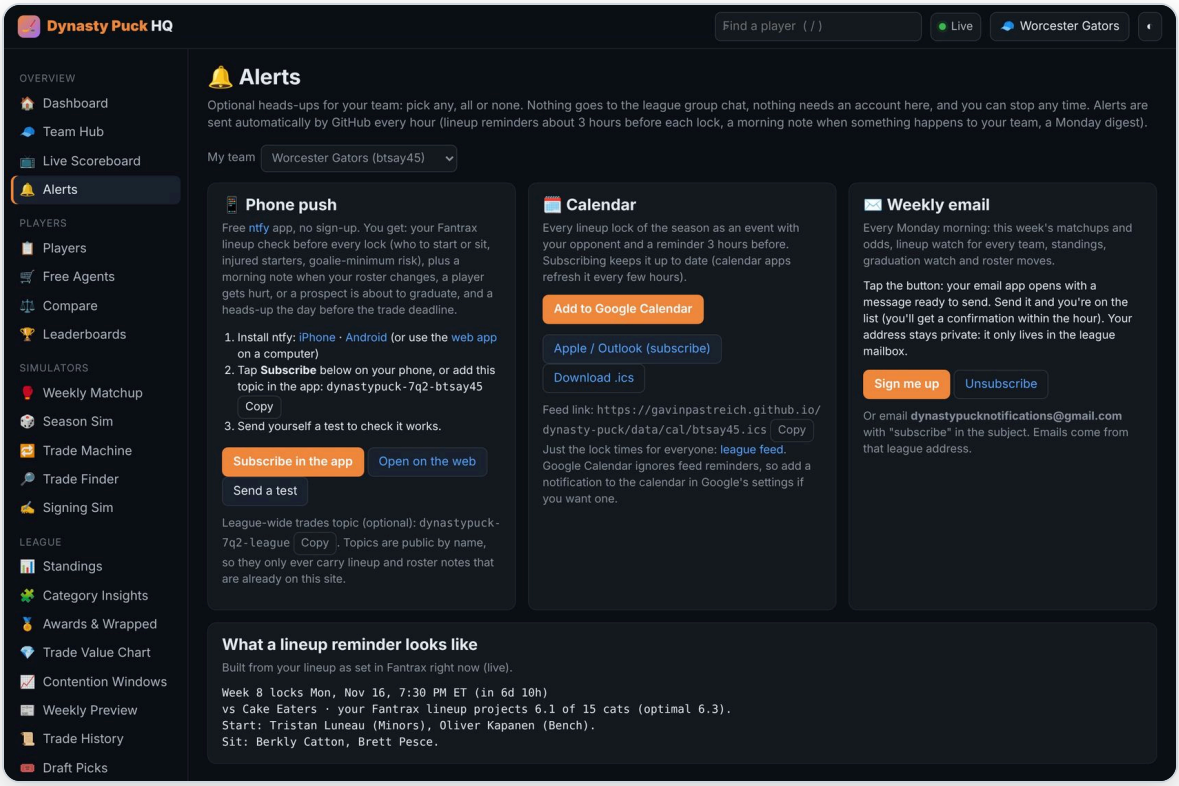

- **Three views**: actual results, rest-of-season projection, or a blend that leans on results more as weeks pile up. Early in the season the blend keeps a couple of odd weeks from deciding everything.
- **Your team, category by category**: where you are winning, where you are losing, and who to call for each need.
- **Trade partners**: a real fit runs both ways. A team ranks high only if it is strong where you are weak *and* wants what you have extra of.
- **Drill into one category**: the players who move it most, on rosters and among free agents.

"Build trade" opens the Trade Machine with players from both sides already loaded.

OPTIONAL

Alerts: only if you want them

Nothing gets posted in the league chat. Each person opts in for their own team, picks how, and can stop any time.

🔔 Alerts page: pick your team, then tap to subscribe.

📱 Phone push

Free **ntfy** app, no account. Tap **Subscribe**, then **Send a test**. Get your lineup check before every lock, plus notes when your roster changes, a player gets hurt, a prospect nears graduation, or the trade deadline is a day away.

🗓️ Calendar

Add to Google Calendar or subscribe on Apple/Outlook: every lineup lock of the season with your opponent and a reminder. It keeps itself up to date.

✉️ Weekly email

A Monday-morning digest: matchups and odds, lineup watch, standings, graduations and moves. Tap **Sign me up** and send the ready-made email; reply "unsubscribe" to stop.

EXAMPLE LINEUP REMINDER

🏒 ntfy · dynastypuck 2:00 PM

Week 1 locks Tue 5:00 PM ET

vs TommyG1095 · your Fantrax lineup projects 8.4 of 15 cats (optimal 8.8).
Start: Artyom Levshunov (Bench), Easton Cowan (Minors), John Gibson (Bench).
Sit: Yaroslav Askarov, Dylan Cozens, Simon Edvinsson.

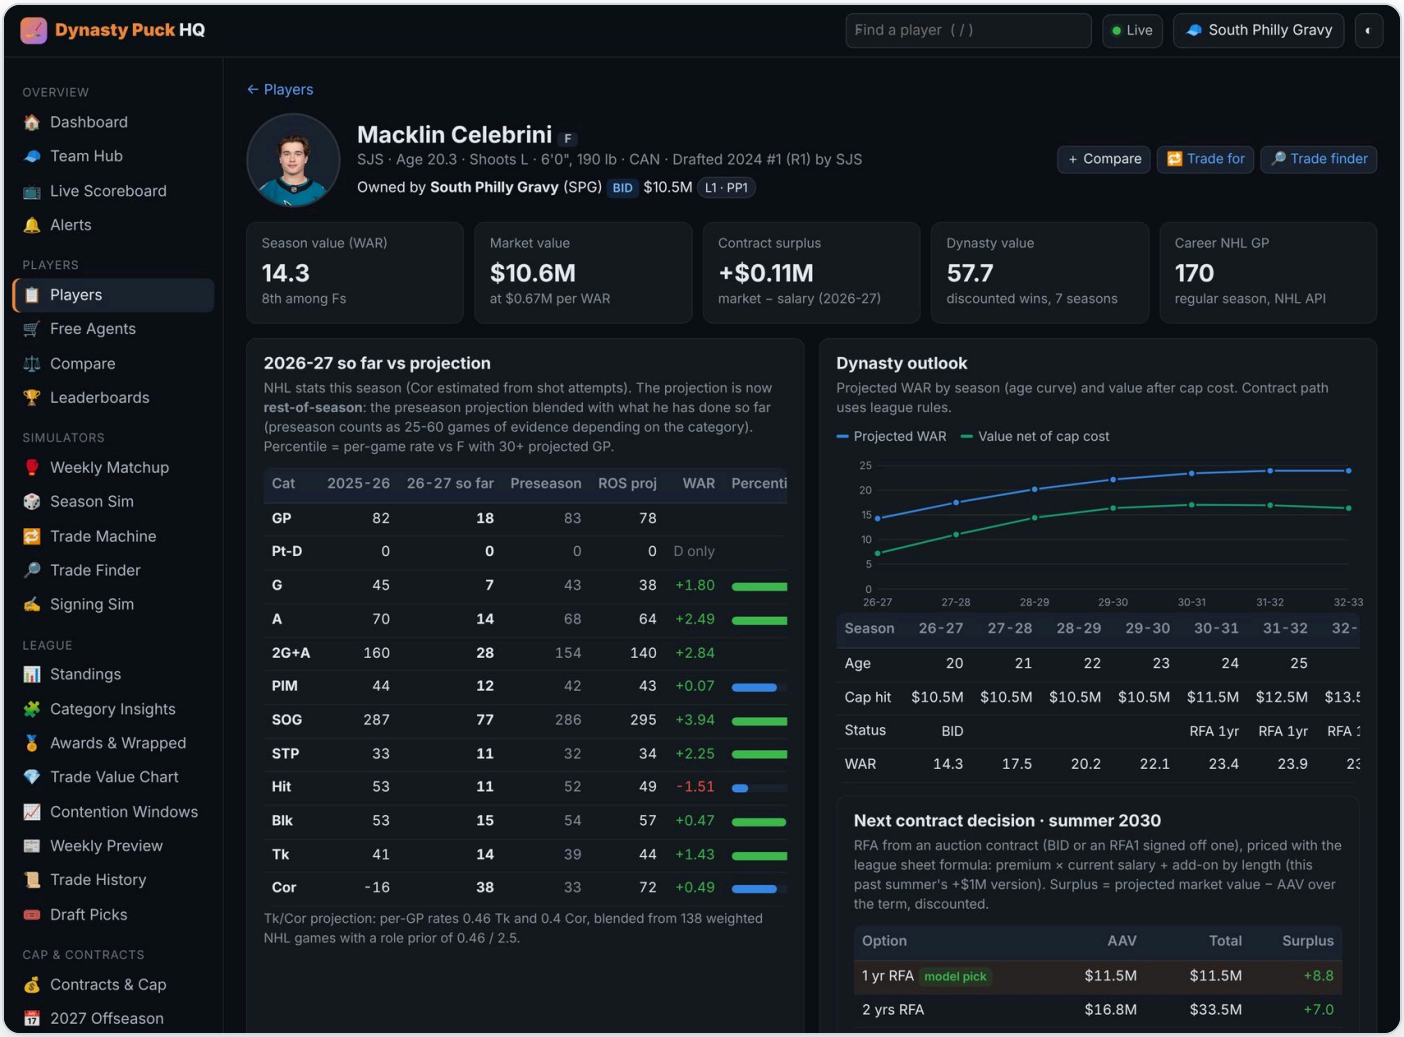

Built from the lineup actually set in Fantrax a few hours before the lock (this example: Milwaukee Musketeers, week 1).

Privacy: phone topics only carry lineup and roster notes that are already on the site. Email addresses stay private in the league inbox and are never published; reply "unsubscribe" to stop. Calendar feeds hold only lock times and opponents.

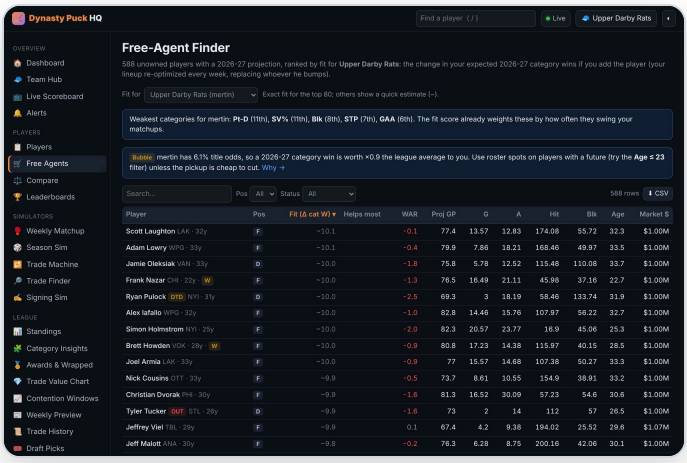

PLAYERS

Every player, valued for our categories

Values are built for our 15 categories and weekly lock, not generic points. **WAR** = category wins above a replacement player; **Dynasty value** = wins over 7 seasons net of cap cost, with our contract rules applied.

Player card: 2025-26 vs 2026-27 projection by category (with percentiles), dynasty outlook by season with the contract path, career by league, NHL history, injuries and line/PP role. Once games start it shows this season's stats and a rest-of-season projection.

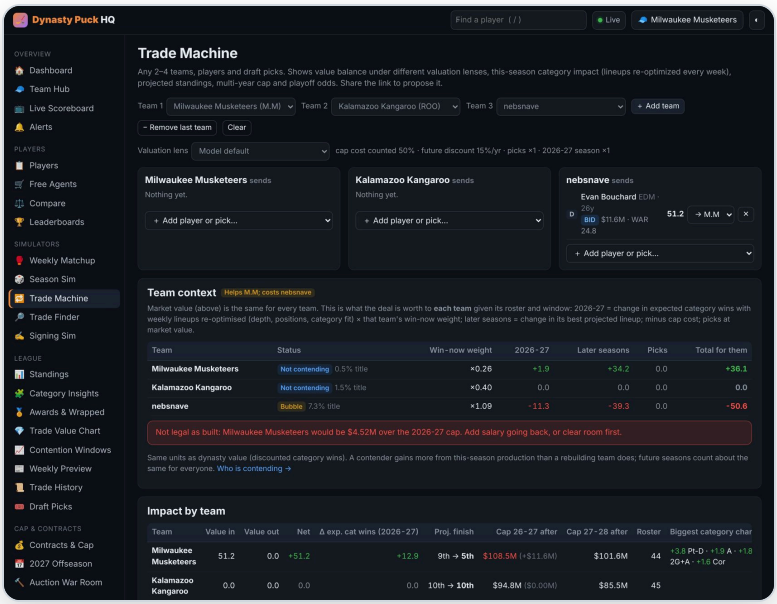

🛒 Free Agents: every unowned player ranked by fit for your team.

- **Players**: search, sort and filter all ~1,250 players; export CSV.
- **Free Agents**: best adds for *your* categories, waivers flagged.
- **Compare**: up to four players side by side (+ Compare on any card).
- **Leaderboards**: best contracts, dynasty value, prospect pools, roster ages.
- Tk and Cor (Fantrax projects them as 0) are projected by the app from NHL data.

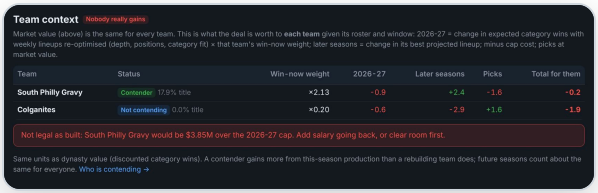

TRADES

Build, balance and grade trades

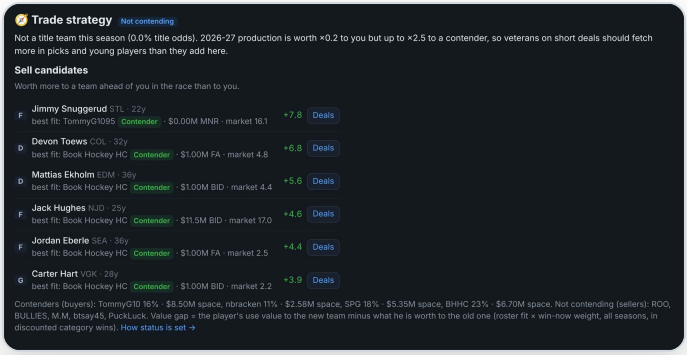

🔁 Trade Machine: 2-4 teams, players and draft picks. Shows value under different "lenses" (the model, the league's own trading tendencies, or your own weights for cap, patience, picks and win-now), the category impact this season, playoff odds before and after, cap after the trade, and a "balance it" suggestion. Share a link to any trade.

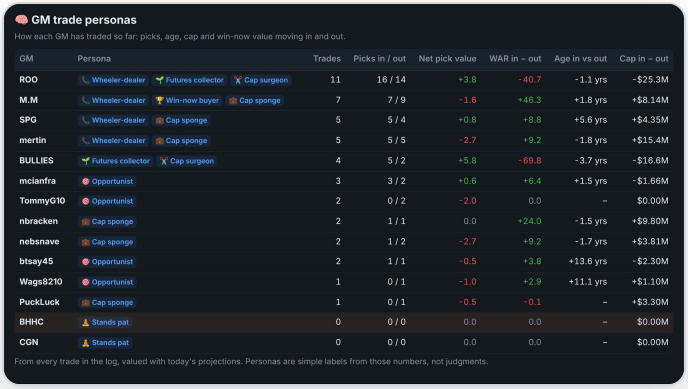

- **Team context**: a contender and a rebuilding team value the same player differently. Every trade shows what it's worth to *each* team: roster fit (depth, positions, categories) × how much this season matters to them.
- **Trade Finder**: "who could I get for X?" and "what would it take to get Y?", ranked by deals that help both sides.
- **League lens**: fitted to our 17 real trades, so you can see how *this league* tends to value picks, youth and cap.
- **Trade History** grades every league trade; the **Trade Value Chart** puts every player and pick on one scale; **Draft Picks** shows who owns every 2027-2029 pick.

Team context: the same deal for a contender (×3.2 win-now weight) and a rebuilding team.

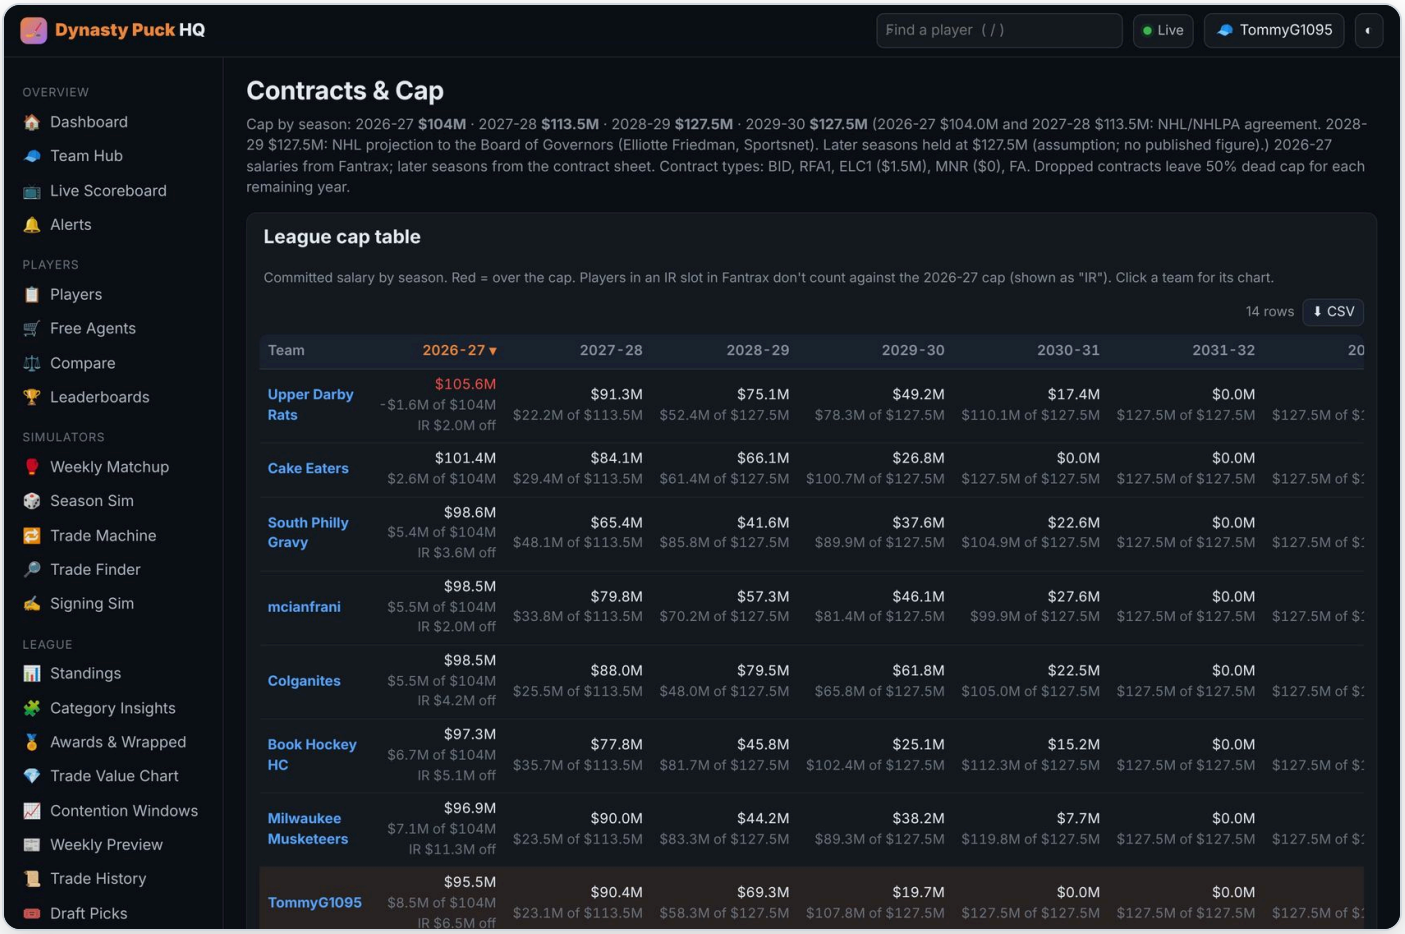

🧭 Trade strategy (Team Hub): contender, bubble or not contending, plus buy targets or sell candidates with the best buyer.

🧠 GM trade personas (Trade History): who buys now, who stockpiles picks.

CONTRACTS & CAP

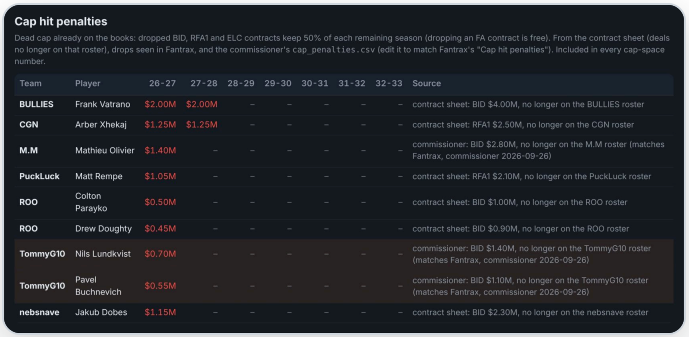

Cap, penalties and every contract decision

💰 Contracts & Cap: committed salary by season against each season's cap, bargains vs overpays, expiring deals with what happens next (ELC up, RFA, or UFA), a contract option calculator and a dead-cap calculator.

Next contract decision (on every player card): every league option priced, with the model's pick, and the projected auction price if he's let go.

Cap hit penalties, included in everyone's cap space.

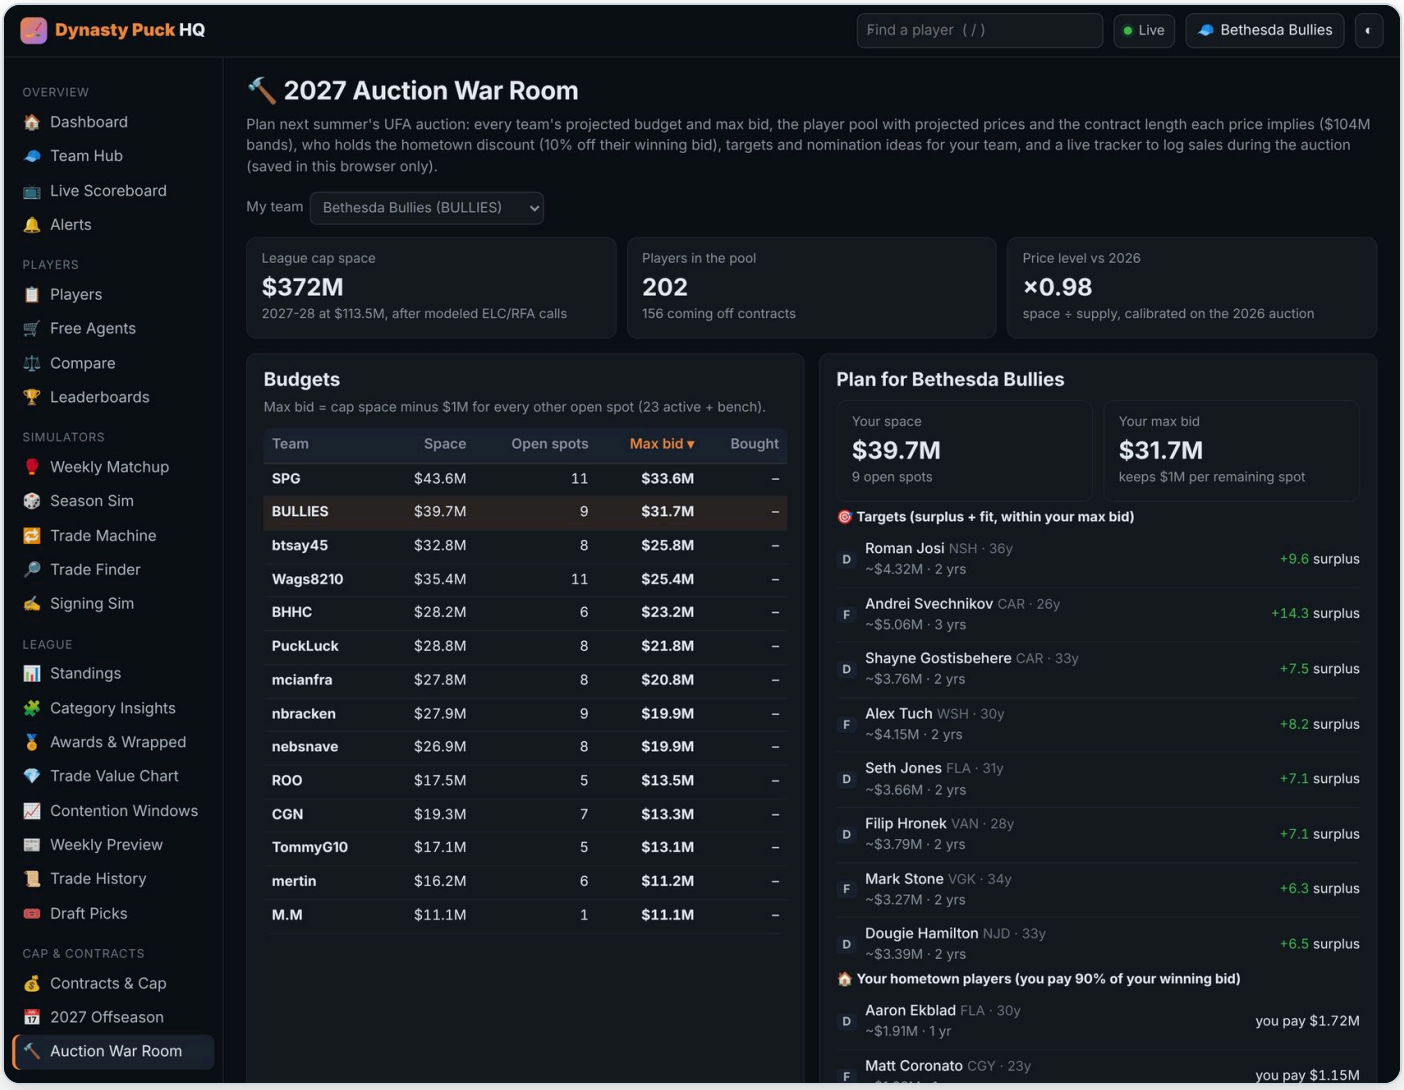

📅 2027 Offseason planner

Every decision coming next summer: ELCs, RFAs (with the right formula for each player), who turns 27 and hits the auction, the model's call, 2027-28 cap outlook at $113.5M, and a priced preview of the UFA auction.

NEXT SUMMER

🔨 Auction War Room

Get ready for the 2027 UFA auction: every team's budget, the whole player pool with projected prices, and a plan for your team.

Budgets and max bids for all 14 teams, targets that fit your team and your budget, "nominate early" ideas to drain rivals' cap, your hometown-discount players, and the pool with prices and the contract length each price implies.

How prices are projected

Calibrated on this summer's auction (62 signings, $147.9M spent). Owners paid about 3-4× more per projected win for players under 27, so prices follow each player's next three seasons. They also scale with how much cap space the league will have next summer. Treat them as a guide; the 2026 auction had no true stars.

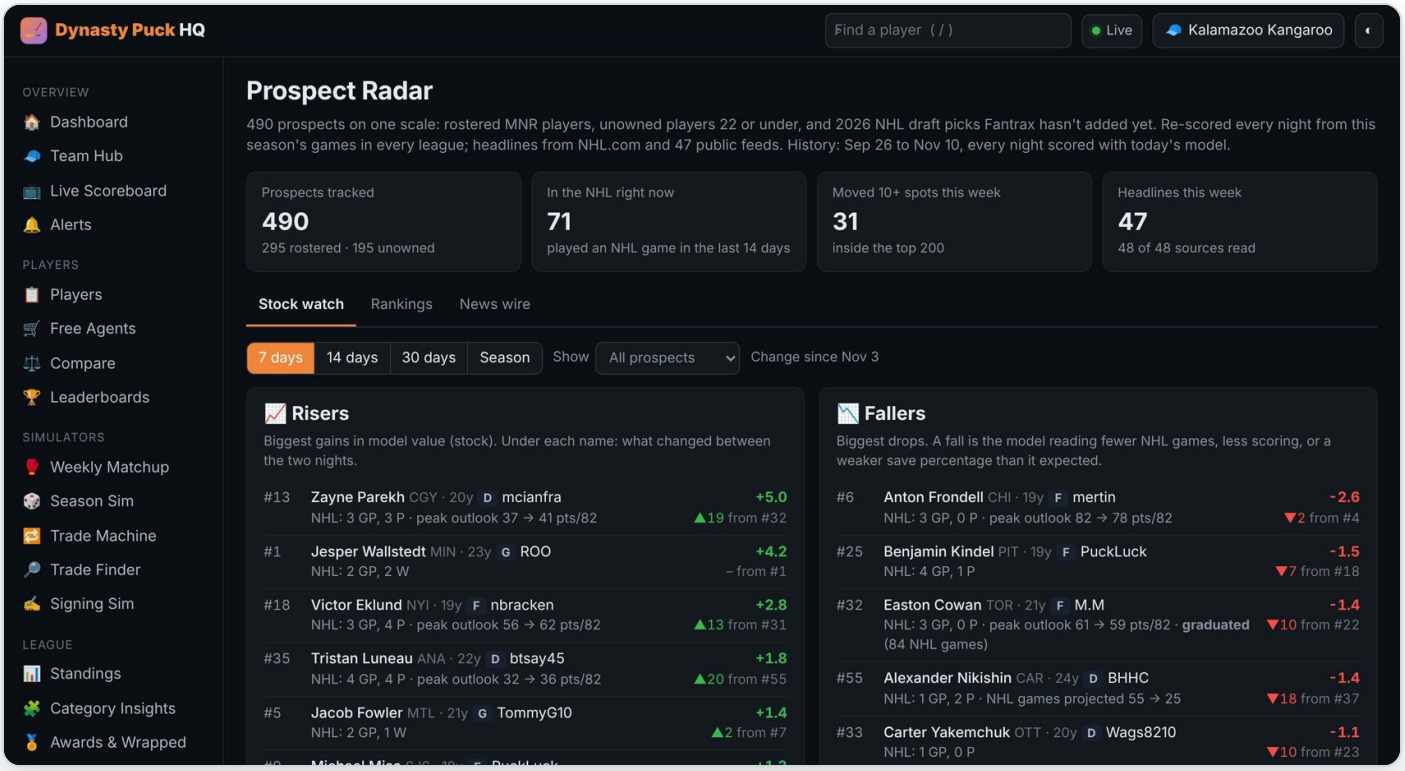

During the auction

Tap **Mark sold** as players go: budgets update and the remaining prices re-adjust to the money and talent left. The **hometown discount** (10% off for the team that held a player from the trade deadline to season's end) is shown for every player.

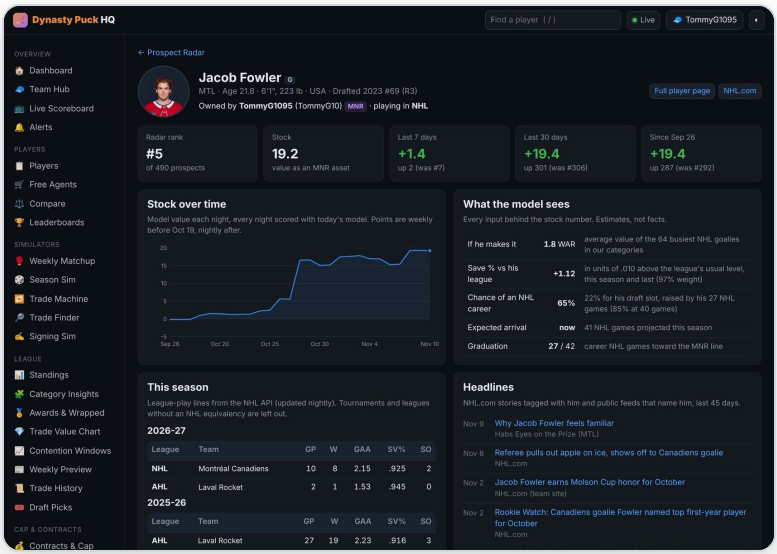

PROSPECTS & DRAFTS

Prospect Radar: who is rising, who is falling, and why

Every prospect is re-scored each night from his games in every league, NHL to junior to Europe, and news about him is collected from around the web. The Radar shows what changed and the reason.

📡 Stock watch: the biggest risers and fallers over 7, 14 or 30 days or the whole season. Under each name is what changed: games and points in that stretch, a new NHL projection, a call-up, an injury.

A report for every prospect: value over time, every input behind the number, this season's lines, recent form and headlines.

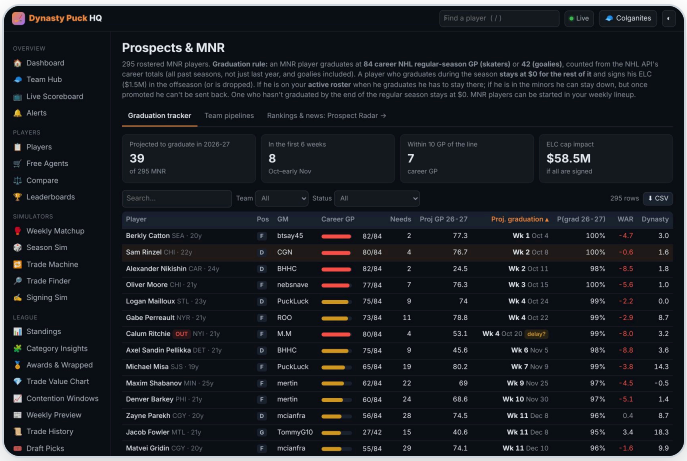

What's in it

- **One scale for everyone**: your MNR players, unowned prospects, and 2026 NHL draft picks Fantrax hasn't added yet (names for the next rookie draft).
- **Rankings**: this season's line in every league, NHL-equivalent scoring this year vs last, the last 14 days, and a trend line.
- **Hot hands**: the best scoring pace over the stretch, translated to NHL terms so leagues compare.
- **News wire**: headlines from NHL.com and about 47 public feeds, filed under each player and tagged call-up, sent down or injury. Filter to your own team.

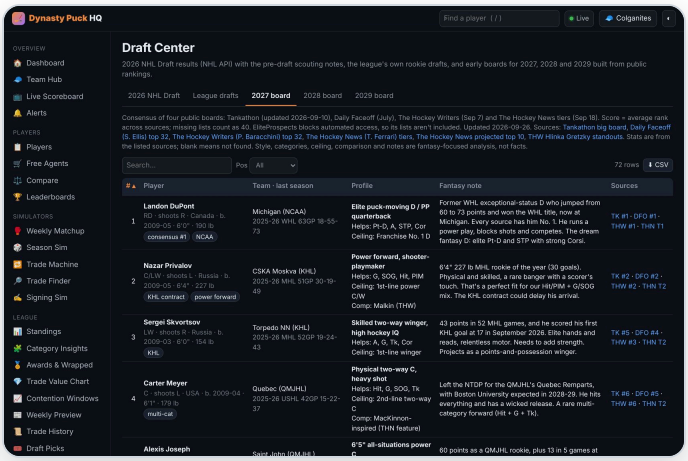

The ranking is a model estimate from games played; headlines never change a number. Your own prospects' week is also on the Team Hub.

PROSPECTS & DRAFTS

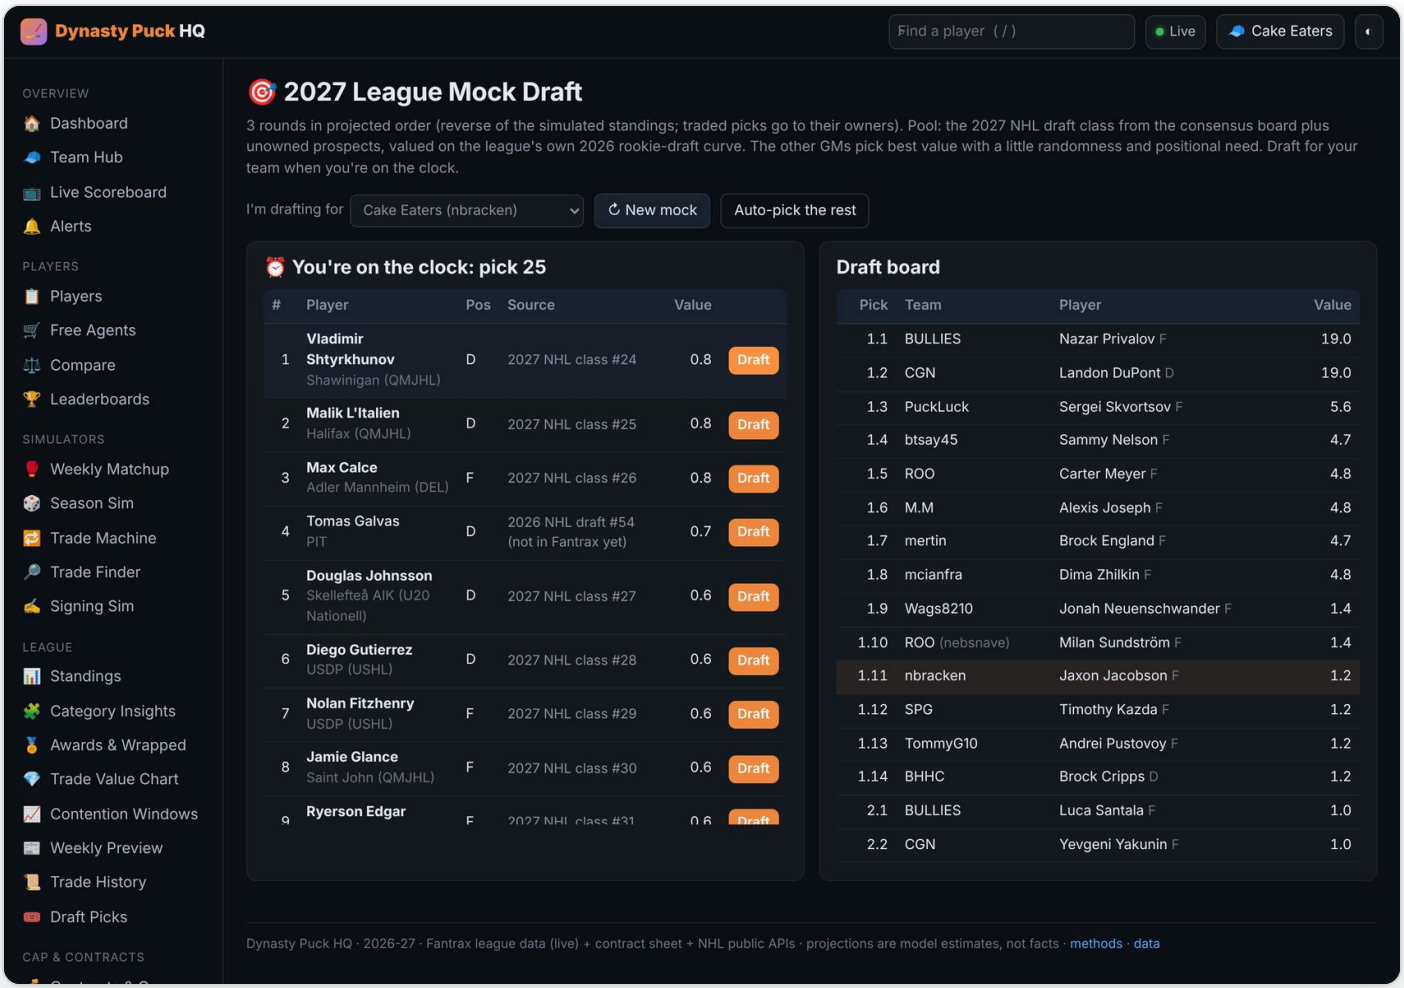

Graduations, boards and a mock draft

🌱 Prospects & MNR: every MNR player's career GP, projected graduation week and date, and team pipelines.

🎯 Draft Center: the 2026 NHL draft with scouting notes, our league drafts, and 2027-2029 boards from public rankings.

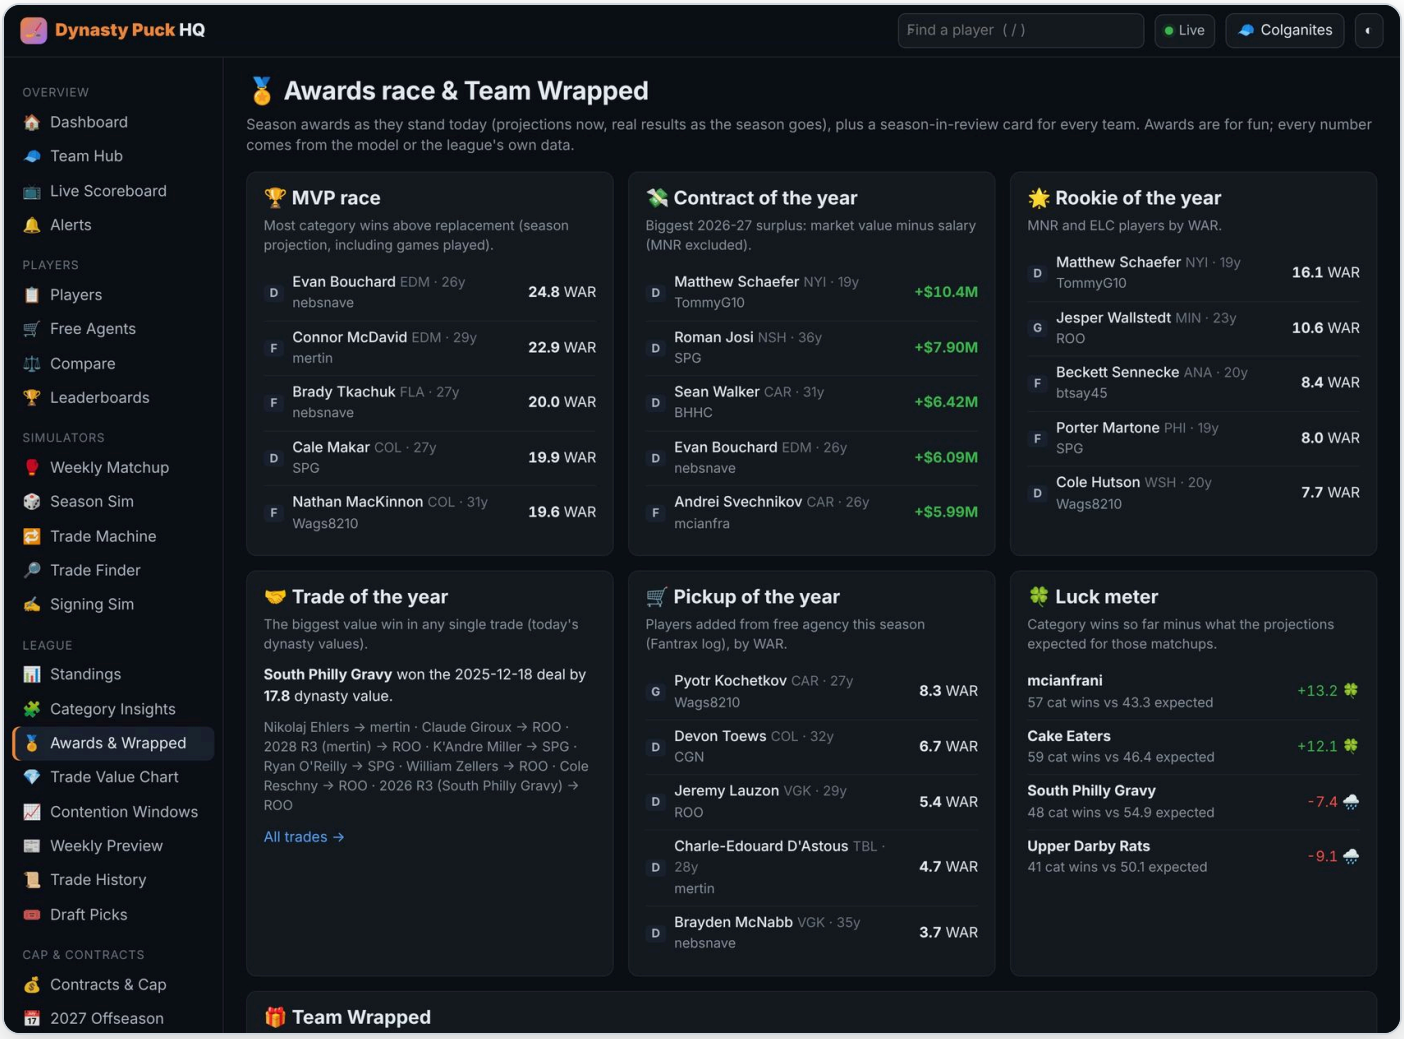

🧪 Mock Draft: the 2027 league draft in projected order (traded picks go to their owners). You pick for your team; the other GMs pick by value and need. Hit "New mock" for a different outcome.

Graduation rule refresher: an MNR player graduates at 84 career NHL games (42 for goalies). He stays at $0 for the rest of that season and signs a $1.5M ELC (or is released) in the offseason. Graduating on your active roster locks him there; graduating in the minors he can stay down, but once promoted he can't go back.

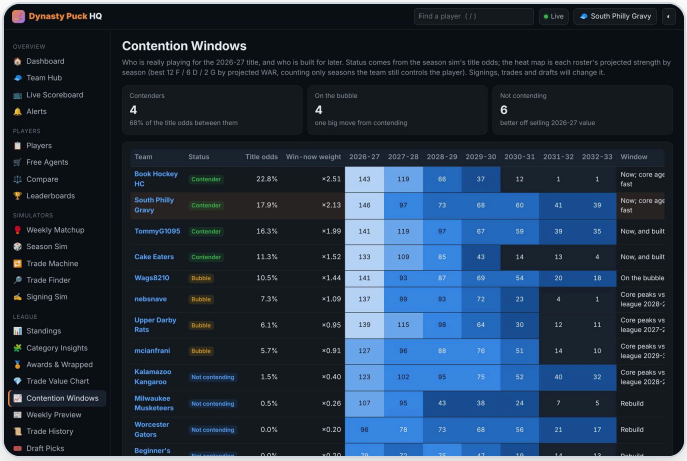

JUST FOR FUN

Awards race, Team Wrapped and contention windows

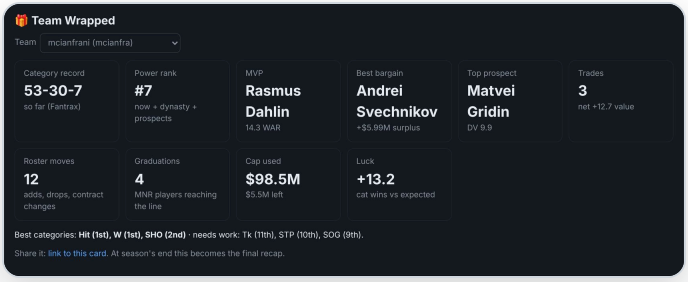

Bragging rights, backed by numbers. Everything here fills in with real results as the season goes.

🏅 Awards race: MVP, contract of the year, rookie of the year, trade of the year, pickup of the year and a luck meter (category wins vs what was expected), plus 🎁 Team Wrapped, a season recap card for any team.

📈 Contention windows: who is really contending (title odds and win-now weight), each roster's projected strength season by season, and a strategy for every team.

🎁 Team Wrapped for one team: record, MVP, best bargain, top prospect, trades, moves, cap and luck.

> Share a team's Wrapped card or any trade idea with a link: the address bar always holds the exact view.

CHEAT SHEET

League rules, as the app uses them

Every number in the app follows these. The commissioner keeps them in one settings file, so they stay current.

Scoring	15 weekly head-to-head categories. Skaters: Pt-D (points by defensemen), G, A, 2G+A, PIM, SOG, STP, Hit, Blk, Tk, Cor. Goalies: W, GAA (lower wins), SV%, SHO. Standings = total category W-L-T.
Lineups	Lock weekly when the Fantrax scoring period starts. 12 F / 6 D / 2 G starters + 3 bench. MNR players can be started.
Goalie minimum	Fewer than 2 goalie games in a week loses all four goalie categories.
Playoffs	8 teams, no byes, weeks 25-27 (Mar 22 - Apr 10, 2027). Division winners are seeds 1-2, then by record. 1v8, 4v5, 3v6, 2v7.
Salary cap	$104M (2026-27), $113.5M (2027-28), $127.5M projected for 2028-29 (NHL's estimate). Contracts: BID, RFA1, ELC1 ($1.5M), MNR ($0), FA.
MNR graduation	84 career NHL GP (skaters) / 42 (goalies). Stays $0 the rest of that season; ELC ($1.5M, 1 or 2 years) or release in the offseason. Active-roster graduates can't be sent down.
When an ELC is up	Release, or re-sign: 2 yrs $2.5M · 3 yrs $4.0M · 4 yrs $5.5M · 5 yrs $7.0M · 6 yrs $9.0M · or one more ELC year at $1.75M (then UFA).
Post-ELC RFA	Under 27 on June 30: re-sign 2-6 years at 1.5× (2-4 yrs) or 1.75× (5-6 yrs) of the base; the base can't go down. Offer sheets allowed (offers or trade packages for his rights). 27+: UFA auction.
RFA on an auction contract	BID and RFA1 players use the league formula (S = salary): 1 yr S+1 · 2 yrs 1.5S+1 · 3 yrs 1.5S+2 · 4 yrs 1.5S+3 · 5 yrs 1.75S+4 · 6 yrs 1.75S+5 ($M; 2027 numbers not final).
UFA auction	The winning bid sets the term: $1-2.9M 1 yr · $3-4.4M 2 · $4.5-7.4M 3 · $7.5-9.9M 4 · $10-13.9M 5 · $14M+ 6.
Trade deadline	Friday, Jan 29, 2027 at 11:59 PM ET.
Hometown discount	The team that had the player from the trade deadline to season's end pays 10% less than its winning bid (the bid still sets the term).
Injured reserve	A player in an IR slot in Fantrax doesn't count against this season's cap. Activating him puts his salary back on it.
Dead cap	Dropping a BID, RFA1 or ELC contract keeps 50% of the salary for every remaining year. Dropping an FA contract is free.
League draft	3 rounds. Reverse standings: worst record picks 1st, champion 14th. Picks exist through 2029; a year is added after each draft.

Summer 2027
ELC/RFA decisions, UFA auction, league draft

HOW IT WORKS

Where the numbers come from

Fantrax (live): rosters, contracts, salaries, lineup slots, standings, divisions, draft picks. Fantrax is always the official record.

NHL public data: stats, career games and schedules every night (84 games, real games per fantasy week); live box scores, play-by-play and shift charts during games for the scoreboard; every prospect's season line in every league.

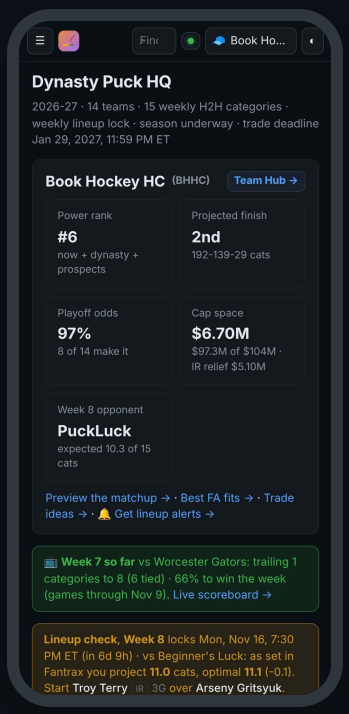

Projections: Fantrax's 2026-27 projections, with Takeaways and Corsi projected by the app, blended with real stats once games start.

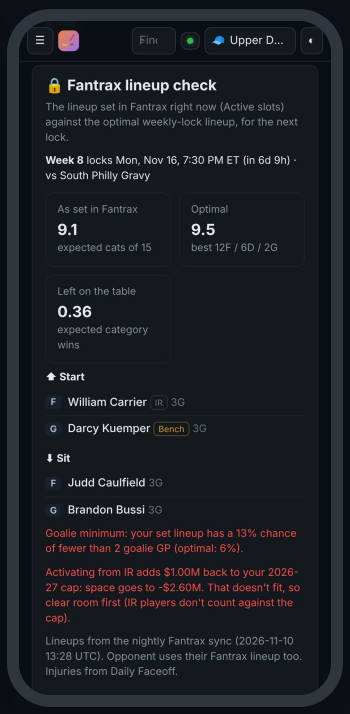

Research: injuries and line combinations from Daily Faceoff; draft boards from public rankings; prospect headlines from NHL.com and about 47 public news feeds; the league's contract sheet and trade history.

Values: WAR = expected category wins above a replacement player. Dynasty value adds up to 7 seasons with age curves, our contract rules and cap cost.

Simulations: every weekly matchup is simulated category by category (goalie minimum included) on the real schedule, thousands of times.

Projections and odds are estimates, not facts. The **Rules & Methods** page in the app explains every formula, and **Data & Updates** shows the sync status and lets you export anything to CSV.

MADE FOR YOUR PHONE

Every page works on a phone. Add it to your home screen and it opens like an app.
